Programme overview
On the Master's programme in Conservation Biology, you will learn how to use modern ecology and genetics within management and restoration, as well as in the study of the loss of biological diversity.

Special features of the programme:
• Global and regional aspects of biodiversity and restoration ecology
• Population ecology as a tool in practical conservation biology
• Analytical methods in conservation biology
• Close connections to research in an international environment

Programme modules/courses
**COMPULSORY COURSES:** Population and Community Ecology, Conservation Biology, Biological Monitoring/Water Management and a Master's degree project in Conservation Biology.

**ELECTIVES:** Evolutionary Animal Ecology, Modelling Biological Systems, Processing and Analysis of Biological Data and Plant Evolution and Adaptation.

Most courses are full-time studies, and you usually take only one course at a time. The courses are typically teaching-intensive, with lectures, seminars, excursions as well as theoretical and practical exercises. You are expected to spend about 40 hours per week on studies, self-studies included. Normally you take two courses of 15 credits per semester, i.e. a total of 60 credits per year. Please note that some courses have other prerequisites than those of the programme.

Career prospects
Conservation biology professionals are needed and employed by a diverse range of governmental and non-governmental organisations in addition to private consultancies and research agencies. The Master's also provides a foundation for continued studies at doctoral level.

Entry requirements and how to apply

**ENTRY REQUIREMENTS**
A Bachelor’s including 90 ECTS credits in biology (of which should include 15 credits in cell biology, genetics and micro-biology, 15 credits in ecology, 15 credits in botany and 15 credits in zoology), and 7.5 credits in statistics. English Level 6 (equivalent to IELTS 6.5, TOEFL 90). For details on English proficiency levels, see www.lunduniversity.lu.se.

**HOW TO APPLY**
1. Apply online: Go to www.lunduniversity.lu.se/biology-conservation-biology. Click on “Apply” and follow the instructions for the online application at the Swedish national application website www.universityadmissions.se. Rank the chosen programmes in order of preference.
2. Submit your supporting documents:
   • General Supporting documents: Check what documents you need to submit (i.e. official transcripts, degree diploma/proof of expected graduation, translations, proof of English, passport) and how you need to submit them at www.universityadmissions.se.

“I study Conservation Biology and believe that Lund University is one of the best in this field, with amazing fieldwork, experienced teachers and a flexible education system that brings a lot of new ideas to the minds of students researching nature. I wish to continue within the field of genetic diversity and hopefully work with natural plant populations.”
Saeed Alaei from Iran
• Programme-specific supporting documents: We encourage you to fill in our Summary Sheet when you apply for this programme. More information can be found on the programme webpage.

3. Pay the application fee (when applicable).

SELECTION CRITERIA/ADDITIONAL INFO
Selection of students is based on grades on academic courses of relevance for the Master’s programme.

TUITION FEES
There are no tuition fees for EU/EEA citizens. For non-EU/EEA citizens the tuition fee for this programme is SEK 145,000 per year. For details on tuition fees, see www.lunduniversity.lu.se

About the Department of Biology
We have an outstanding competence in both education and research, covering a large number of biological disciplines with everything from molecular biology to large scale ecology. Several of our research groups are world-leading within their topic, which shows by the large number of international projects being coordinated from the department of Biology. Since our education is integrated with the research within the department you will, during your studies, have researchers as teachers and get into close contact with the ongoing projects. Our courses range from basic to Master’s level and we offer around 50 advanced level courses. We also have an extensive postgraduate programme.

About Lund University
Lund University was founded in 1666 and is repeatedly ranked among the world’s top 100 universities. The University has 42,000 students and 7,400 staff based in Lund, Helsingborg and Malmö. We are united in our efforts to understand, explain and improve our world and the human condition.

Lund is the most popular study location in Sweden. The University offers one of the broadest ranges of programmes and courses in Scandinavia, based on cross-disciplinary and cutting-edge research. The compact university campus encourages networking and creates the conditions for scientific breakthroughs and innovations. The University has a distinct international profile, with partner universities in over 70 countries.

Lund University has an annual turnover of SEK 8 billion, of which two-thirds go to research. Our research is characterised by both breadth and strength and, according to independent evaluations, over 30 of our research fields are world-leading.

The establishment of the world-leading facilities MAX IV and ESS will have a major impact on future scientific and industrial development in both materials science and life science. MAX IV, which was inaugurated in June 2016, is the leading synchrotron radiation facility in the world, while the European research facility ESS will be the world’s most powerful neutron source when it opens for research in 2023. Adjacent to these facilities, Science Village Scandinavia is also being developed into a meeting place and testing environment for research, education and entrepreneurship.
