Programme overview

The general Master’s Programme in Biology gives you an opportunity to design a personal study plan. You choose from around 50 courses at advanced level in biology. We have excellent facilities for laboratory work and conducting field experiments. Most courses are full-time studies and you usually take only one course at a time. The courses are typically teaching-intensive, with lectures, seminars, excursions as well as theoretical and practical exercises. You are expected to spend about 40 hours per week on studies, self-studies included. Normally you take two courses of 15 credits per semester, i.e. a total of 60 credits per year.

Special features of the programme

- Broad range of courses covering subjects from cell and molecular biology to organismic biology and ecology
- Close connections to research in an international environment
- Extensive experience in offering courses in English and well developed student exchange programmes
- Integration of theoretical analyses with strong training of laboratory skills and field work
- Freedom to design your own study programme and specialisation

Programme modules/courses

**COMPULSORY COURSES:** Master’s degree project in biology. Advanced level courses in biology (60 credits), see list of courses [http://biology.lu.se/education/courses/advanced-courses](http://biology.lu.se/education/courses/advanced-courses).

Career prospects

The knowledge and skills you will gain on this programme open doors to employment within many sectors of academia and society. Employment can be found within agencies concerned with environmental protection issues, education or research funding. The programme also provides a solid grounding that prepares you for further postgraduate studies.

Entry requirements and how to apply

**ENTRY REQUIREMENTS**

A Bachelor’s degree including 90 credits in biology (of which should include 15 credits in cell biology, genetics and microbiology, 15 credits in ecology, 15 credits in botany, and 15 credits in zoology), 15 credits in chemistry and 7.5 credits in statistics. English 6/English Course B. See [www.lunduniversity.lu.se](http://www.lunduniversity.lu.se) for details on English proficiency levels.

**HOW TO APPLY**

1. Apply online: Go to [www.lunduniversity.lu.se/biology](http://www.lunduniversity.lu.se/biology). Click on “Apply” and follow the instructions for the online application at the Swedish national application website [www.universityadmissions.se](http://www.universityadmissions.se). Rank the chosen programmes in order of preference.

**“I study within the general Master’s Programme in Biology. The thing I really like about my education is how friendly the professors and teachers are – you really get to know them personally and this gives a lot of valuable contacts.”**

Christoffer du Rietz from Sweden
2. Submit your supporting documents: Check what documents you need to submit (i.e. official transcripts, degree diploma/proof of expected graduation, translations, proof of English, passport) and how you need to submit them at www.universityadmissions.se.

4. Pay the application fee (when applicable).

**SELECTION CRITERIA/ADDITIONAL INFO**

Selection of students is based on grades on academic courses of relevance for the Master’s programme.

**TUITION FEES**

There are no tuition fees for EU/EEA citizens. For non-EU/EEA citizens the tuition fee for this programme is SEK 145,000 per year. For details on tuition fees, see www.lunduniversity.lu.se

**About the Department of Biology**

We have an outstanding competence in both education and research, covering a large number of biological disciplines with everything from molecular biology to large scale ecology. Several of our research groups are world-leading within their topic, which shows by the large number of international projects being coordinated from the department of Biology. Since our education is integrated with the research within the department you will, during your studies, have researchers as teachers and get into close contact with the ongoing projects. Our courses range from basic to Master’s level and we offer around 50 advanced level courses. We also have an extensive postgraduate programme.

---

**About Lund University**

Lund University was founded in 1666 and is repeatedly ranked among the world’s top 100 universities. The University has 41,000 students and 7,500 staff based in Lund, Helsingborg and Malmö. We are united in our efforts to understand, explain and improve our world and the human condition.

Lund is Sweden’s most attractive study destination. The University offers one of the broadest ranges of programmes and courses in Scandinavia, based on cross-disciplinary and cutting-edge research. The compact university campus encourages networking and creates the conditions for scientific breakthroughs and innovations. The University has a clear international profile, with partner universities in over 70 countries.

Funding of more than SEK 5 billion a year goes to research at eight faculties, which gives us one of Sweden’s strongest and broadest ranges of research activity. Over 30 of our research fields are world-leading, according to independent evaluations.

Two of the world’s leading materials research facilities are currently under construction in Lund: the MAX IV Laboratory, inaugurated in June 2016, is the leading synchrotron radiation facility in the world, and the European research facility ESS, which will house the world’s most powerful neutron source. The two facilities will be of decisive importance for future scientific and industrial development in both materials science and life science.
