Programme overview
The Master of Science in Development Studies is an interdisciplinary social science programme focusing on problems of poverty and development. The objective of the programme is to provide you with background knowledge and practical skills to understand, assess and work in development-related fields, whether in direct poverty reduction or in other aspects of social, economic and institutional development. You will acquire a critical social science approach and will conduct your own research within the context of the Master’s thesis. You will be trained in various social science methods, both qualitative and quantitative. You will also gain general skills like problem solving, working in teams, cultural understanding, writing independent reports as well as conceptual, analytical and evaluative skills.

The programme offers a wide range of alternatives for you. There are many social science courses within the Faculty of Social Science to provide you with deeper knowledge within your disciplinary background or in other fields beneficial to your research interests. You will be given the chance to take an active part in shaping your education by tailoring your studies to your interests and career goals, especially in the second half of the programme.

There are good opportunities to go abroad and take courses at one of the many universities with which we have exchange agreements. If you wish to work in development-related fields you can also choose to do an internship.

Previous students have worked, for example, at embassies spread over the world, in governmental and non-governmental development agencies within the UN and the EU and in various NGOs, and in the private sector.

Programme modules/courses
COURSES AND NUMBER OF CREDITS: Theories and Issues in Development (15 credits), Research Methods (15), Historical Aspects of Development (15), Theory of Sciences/Research Methods (15), Master’s degree thesis (30). Elective courses and/or studies abroad, and/or internship (30).

Career prospects
The programme provides you with both the background knowledge and the practical skills needed to work in development related fields. You will gain a critical understanding of trends and debates within development work. You will be prepared to make contributions to sustainable development in roles such as policy makers or practitioners in government agencies, private firms and NGOs, or alternatively, for doctoral studies and a continued academic career.

About the Faculty of Social Sciences

The Faculty of Social Sciences offers a wide variety of Master’s programmes that are either interdisciplinary, thematic programmes or programmes in certain disciplines. The variety of programmes and courses makes it possible for most students to find something to suit their interests. You can obtain a Master’s degree in a traditional discipline such as Political Science or Sociology, or in a thematic field such as Development Studies or Global Studies. The degree you are awarded depends on the courses you take and within which discipline you write your Master’s thesis. All Master’s programmes at the Faculty give you eligibility for PhD studies. We also offer a Bachelor’s degree programme in Development Studies.
