The International Master of Science in Fire Safety Engineering (IMFSE) is a two-year educational programme in the Erasmus+ framework. This Master's programme is organised jointly by:

- Ghent University, Belgium (coordinator)
- Lund University, Sweden
- The University of Edinburgh, UK

These three leading European research universities with complementary expertise in the field of Fire Safety Engineering (FSE) join together with the main objective of creating an educational programme that defines the required knowledge for a professional fire safety engineer, capable of developing a Performance Based Design (PBD). The three IMFSE universities are leading European institutions in the field of fire safety, providing both educational programmes and high-level research. Ghent aims at general FSE, Lund is recognised in enclosure fire dynamics, CFD modelling, human behaviour during fires and evacuation and towards methods for risk assessment, and Edinburgh is the developer of the first curriculum in structural fire safety engineering.

The consortium has three associated partners: ETH Zürich, Switzerland, The University of Queensland, Australia and the University of Maryland, USA.

IMFSE also involves 7 industrial partners as official sponsors. With their annual financial contributions, it has been possible to create the ‘Sponsorship Consortium’ which awards IMFSE students full or partial scholarships.

The IMFSE programme consists of four semesters of 30 ECTS credits each. The mobility structure, with possible change in study location after each semester, gives the students the opportunity to gain from the strengths and expertise of each of the three universities.

The classes in the first semester can be attended in Ghent or Edinburgh. All students spend the second semester in Lund. In the third semester, classes are again taught in Ghent (for general FSE) or Edinburgh (with focus on structural engineering in the context of FSE). The fourth semester is devoted to the Master’s thesis, hosted by one or more of the three institutes.

Fire Safety Engineering

Fire Safety Engineering is a multidisciplinary field that requires a deep understanding of building design and construction, the thermo-chemical processes associated to fire growth, human behaviour and the representation of the many uncertainties through risk assessments. A Fire Safety engineer fulfils a broad range of duties, all related to fire safety. This can range from designing fire protection for a space station, to ensuring that the occupants of buildings are safe from fire. Fire Safety engineers have always been in great demand by industry, insurance companies, rescue services, educational institutions, consulting firms, and government bodies around the world.

Programme modules/courses

COURSES AND NUMBER OF ECTS CREDITS:

- **Semester 1 (mobility track 1), Ghent University (G):** Fire Dynamics, Basics of Structural Engineering, Thermodynamics, Heat and Mass Transfer and one of the following electives: FSE Based Fire fighting, Modelling of Turbulence and Combustion, Turbomachines, Introduction to Entrepreneurship.

- **Semester 1 (mobility track 2), University of Edinburgh (E):** Fire Science and Fire Dynamics, Engineering Project Management, Fire Safety, Engineering and Society, Fire Safety Engineering.

- **Semester 2, Lund University (L):** Risk Assessment, Advanced Fire Dynamics, Human Behaviour in Fire, Simulation of Fires in Enclosures.

“I love this programme. The courses I have taken so far really prepare you as a fire safety engineer. I have been exposed to so many different topics. The study environment at Lund University is special. The teachers are always open to helping you out if you ask for assistance.”

Rohan John Baptiste, from Saint Lucia
• Semester 4: Master’s thesis: can be performed at the associated partners or at other universities, industry or research institutes.

Entry requirements and how to apply

ENTRY REQUIREMENTS
A Bachelor’s degree or recognised equivalent from an accredited institution (minimum 3 years full-time study or 180 ECTS credits) in civil, structural, mechanical, electrical, chemical, industrial engineering, material sciences, chemistry, physics, applied physics, architecture, urbanism and spatial planning or a related discipline. Students in their last year of such a Bachelor’s programme will also be considered. Sufficient English language ability is also an admission requirement. See www.imfse.ugent.be for detailed information about the entry requirements.

HOW TO APPLY
See www.imfse.ugent.be for detailed application instructions, application forms and deadlines.

TUITION FEES
For details on tuition fees and scholarships, see www.imfse.ugent.be

About Lund University
Lund University was founded in 1666 and is repeatedly ranked among the world’s top 100 universities. The University has 42 000 students and 7 400 staff based in Lund, Helsingborg and Malmö. We are united in our efforts to understand, explain and improve our world and the human condition.

Lund is the most popular study location in Sweden. The University offers one of the broadest ranges of programmes and courses in Scandinavia, based on cross-disciplinary and cutting-edge research. The compact university campus encourages networking and creates the conditions for scientific breakthroughs and innovations. The University has a distinct international profile, with partner universities in over 70 countries.

Lund University has an annual turnover of SEK 8 billion, of which two-thirds go to research. Our research is characterised by both breadth and strength and, according to independent evaluations, over 30 of our research fields are world-leading.

The establishment of the world-leading facilities MAX IV and ESS will have a major impact on future scientific and industrial development in both materials science and life science. MAX IV, which was inaugurated in June 2016, is the leading synchrotron radiation facility in the world, while the European research facility ESS will be the world’s most powerful neutron source when it opens for research in 2023. Science Village Scandinavia is also being developed into a meeting place and testing environment for research, education and entrepreneurship.
