Programme overview

This intensive, one-year full-time programme prepares recent non-business graduates for a wide range of careers in management. As firms and public agencies recruit managers, they often look for dynamic people that have both specialist knowledge and a generalist management competence.

The programme is designed for students that already hold a recent first degree in a subject matter other than business or management, looking to develop key managerial skills. No previous professional experience is necessary, but candidates are expected to have a strong interest in management.

We offer an international learning experience and global networking opportunities. The MSc in Management is not just about lectures and assignments, we also give you challenging group projects to develop your team-working skills and help you apply your knowledge to contemporary business issues.

The programme has been developed by our renowned faculty in close cooperation with leading companies to ensure that it provides highly relevant transferable skills and knowledge for the workplace and beyond. The programme is driven by a practical and applied teaching philosophy – the Lund Learning Model – that focuses on experiential learning and development.
