

Sylvia Schwaag Serger and Torbjörn von Schantz.

Statement from the Vice-Chancellor and Deputy Vice-Chancellor

A new government was installed at the beginning of the year. Three ministers have visited Lund University and its management since then: Matilda Ernkrans, Ibrahim Baylan and Anders Ygeman. The visits have focused on important matters for the University such as creating sustainable funding for research, education and research infrastructure, providing conditions for academia and the business sector to work together with regard to MAX IV and ESS, as well as creating strategies for AI in research and education. These issues have also been addressed in other ways, for example, in the input into the research policy bill.

The issue of sustainability has been ubiquitous. In the spring, the University received a Climate Call from close to 5 000 students demanding a reduction in the University's greenhouse gas emissions. In 2019, the University established a sustainability strategy and adopted new travel regulations. In addition, the University is working on sustainability by reinforcing research, education and external engagement on the issue. In the autumn, the first doctoral students were admitted to the Agenda 2030 Graduate School. Since the start, it has stirred great interest and received applications from 106 countries during the year.

Education and research of the highest quality are prioritised areas in the strategic plan. During the year, SEK 20 million was allocated to the comprehensive quality evaluation of all research at Lund University. The RQ20 project had its kick-off in September and comprises both self-evaluations and assessments by external panels. The project is scheduled for completion in 2020.

Better and clearer career paths are important for the quality of the organisation. During the year, the University adopted a new policy on career paths for teaching staff and researchers. It is an important milestone to open up the careers system, invest in careers and professional development and to provide greater opportunities for promotion in academic careers. The work on gender equality and equal opportunities has also been reinforced with, among other things, a new project manager with the aim to have greater impact on these issues.

Open access to research publications and the publishing and archiving of research are important issues internationally and nationally. The University allocated SEK 4.5 million in 2019 to ensure that the University's researchers are able to adapt to a more open research system as well as to new demands and work methods for the archiving of research data.

The MAX IV research facility is a flagship for Swedish research. The accelerator programme comprises a significant technology leap and the light source has begun to deliver its world-leading capacity. During the year, the Swedish Research Council confirmed that MAX IV had achieved positive results to remedy the delays that had

previously been revealed in the beamline programme and the University has appointed a new director at MAX IV. A specific assignment has been created in order for the University to be able to vigorously pursue matters concerning MAX IV's future funding and strategies at the national level.

Science Village Scandinavia is being planned between the MAX IV and ESS facilities, with dynamic meeting places for academia and industry. During the year, the University progressed in its work to investigate conditions for environments that can and wish to relocate there. The University is taking decisions in stages – both with regard to volume and costs. It is clear that this investment offers significant opportunities – while we must be prepared for rental costs to increase.

An increasing number of students access support for mental ill health. This has an impact on the University's organisations at both the faculties and the Student Health Centre. During the year, the University established a project to review current resources, services, initiatives and work methods to ensure that students who seek help receive adequate support – both to improve their health and also to increase the opportunities for more students to complete their studies.

Campus Helsingborg is an important part of the University, not least for widening recruitment. Lund University has decided to reinforce the organisation and increase the number of students to at least 4000 students. The University has invested SEK 35 million over five years to stimulate research and new courses and study programmes.

There is a significant shortage of teachers and, over a number of years, the government has expanded the teacher training in Sweden and Lund University wants to be a part of this expansion. In Lund, there is currently a programme in secondary education and, during the year, an inquiry was initiated on how this programme could be developed.

In 2019, Lund University was one of six universities to receive funding in the European Universities Initiative. It aims to strengthen the mobility of students and staff within Europe. The competition for the pilot projects was fierce. Lund University will collaborate with four European universities within health in the project European Universities Alliance for Global Health. The University continues its work on internationalisation and an action plan for internationalisation has been drawn up.

Transitions was the theme for the University's first Future Week, which took place in October. Researchers from all faculties held open lectures on significant questions about the future. The week will be an annual event.

Torbjörn von Schantz, vice-chancellor Sylvia Schwaag Serger, deputy vice-chancellor

Welcome to Lund University

Lund University is well anchored in its history while also being an important and driving force to transform and improve our future. The University's unique strength lies in its diversity and breadth. Together, the University's different parts can contribute to creating a whole that is stronger than its individual parts and that can face future challenges and needs.

The application rate for first cycle programmes continues to be high. The University's approximately 40 000 students are able to choose from a large number of study programmes and freestanding courses. There is still a trend for more students to apply for different kinds of programmes than for freestanding courses. Lund University is an attractive university where the number of international students continues to increase.

The diverse and well-developed student life in Lund is a significant factor in making the University an attractive and rewarding meeting place for students. The students' unions and nations are important organisations in this work. The University is actively working to create study environments that enable meetings between students from different areas and faculties as well as between Swedish and foreign students.

World-leading research in many fields is carried out at Lund University. Several significant external research projects were obtained in competition with other universities during the year. A well-developed collaboration with organisations, companies and wider society is a self-evident cornerstone in the University's activities. Lund University has also continued to show positive economic development. Not least, the percentage of external funding has steadily increased over the past year and the majority of the University's research funds come from external funding bodies.

The foundation for major and significant research break-throughs in the future is now being laid at Lund University. MAX IV comprises a significant technology leap and has attracted attention from all over the world. Its capacity provides conditions for unique research in several research fields. Together with ESS, MAX IV demonstrates how Sweden is taking a prominent role as a research nation. Between these facilities there is a new and unique environment emerging – Science Village Scandinavia (SVS).

ABOUT THE ANNUAL REPORT

The annual report is the official report on the University's activities and economic results and is submitted to the government in accordance with the Annual Reports and Budget Documentation Ordinance (2000:605). The report is to comply with the formal requirements but is also to be informative for those who would like to know more about what is happening within Lund University. Therefore, the contents of the annual report include not only information that the University is obliged to report on but also other information that may be of interest to obtain an overview of the University's activities in 2019. In addition, the annual report is an important

document for the University Board in determining whether the internal direction and administration is satisfactory at the University.

The annual report consists of profit and loss statements, financial results and financial reports. The profit and loss statements report on volumes, revenues, expenditure and results within the main activities as well as important events that have affected the results of the organisation. The annual report is to provide an accurate presentation of the organisation and demonstrate that the University operates in accordance with the principles of reliability, relevance, comparability, comprehensibility and transparency. This annual report strives to provide not just spot checks of the past year but also to indicate and explain significant changes between the years.

STRATEGIC PLAN AND STRATEGIC WORK

The annual report can make it easier to take a step back to view the different activities from a more holistic perspective. In addition, there is also the annual risk assessment procedure and a general business intelligence report. The University's business intelligence provides an additional shift in perspective and places the University's opportunities in a larger context. Together, these different procedures and documents provide an overview of the University's development, challenges, strengths and potential future.

Lund University has an overarching and general strategic plan that covers the period between 2017 and 2026. Lund University is a university that works to understand, explain and improve our world and the human condition. The strategic plan is based on the premise that a clear strategic shift is required for Lund University to be able to continue developing as a stable bearer and developer of knowledge in a changing world as well as reinforcing its position as a leading university and inspiring societal force.

The strategic plan indicates the direction; however, not everything can be done at once. Priorities need to be made and different steps taken at different times. The annual organisational plan, which is connected to the University's allocation of resources, highlights different initiatives and objectives based on the strategic plan. The organisational plan weaves the strategic plan, the annual risk analysis and the University's overarching business intelligence report together. In addition, every faculty and department works to develop and improve its education, research and external engagement.

Welcome to Lund University's annual report

Financial development

Lund University's strong financial growth has continued in 2019 (primarily within research), and the level of activity in terms of expenditure amounted to SEK 8852 million. This constitutes an increase of SEK 388 million from the previous year and by SEK 1 060 million since 2015. Funding from grants has increased by SEK 676 million within the past five years, in comparison with 2018 there has been a increase of SEK 300 million. The result for 2019 is a surplus of SEK 57 million, divided between a surplus of SEK 17 million in education and a surplus of SEK 40 million in research. The budgeted surplus for the University as a whole (SEK 82 million) was slightly higher than the actual result (SEK 57 million). Both the authority's revenue and expenditure increased in relation to the budget. It is primarily grant revenue and staff expenditure within research that have increased as the research has been successful in attracting more research funding than was budgeted.

At the end of 2019, the agency capital amounted to SEK 1791 million, divided between SEK 426 million in education and SEK 1365 million in research. The agency capital in research is largely located among the departments and research groups at the faculties that have a large proportion of external funding. The University Board has decided that the overall target for agency capital by the end of 2019 is to be 15 per cent (target calculated in relation to the University's operating costs). The outcome of the agency capital target for 2019 was 19 per cent, which is 1 per cent lower than in

2018 despite the increase of agency capital increasing by SEK 57 million. This means the operating costs have increased so that the relationship between capital and costs has changed. The increase in grant funding in recent years has been more rapid than the increase in activity, and some of the revenue is intended to be used over several years. MAX IV, for example, has received funding to cover the cost of operations and depreciations in the coming years. In total, the unused grants amount to SEK 4058 million which is an increase by SEK 133 million since 2018, of which SEK 301 million is estimated to be tied up for future depreciations.

| | | | | | |

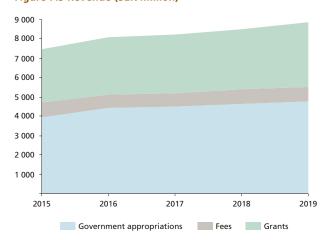

Revenue

The revenue for 2019 amounts to SEK 8 895 million excluding collections and transfers, which is an increase in SEK 379 million compared to 2019. Compared to 2018, all revenue has increased apart from fees which decreased by SEK 3 million. The appropriation revenue amounts to SEK 4763 million, divided between SEK 2 218 million in education and SEK 2 545 million in research. This is an increase of SEK 99 million (2.1 per cent) compared to 2018, divided between SEK 39 million for education and SEK 61 million for research. Revenue from fees amounts to SEK 741 million, which is a marginal decrease of SEK 3 million (0.4 per cent) from the previous year. Grant revenue amounts to SEK 3 361 million, which is an increase of SEK 266 million (8.6 per cent) from 2018 and demonstrates the University's ability to attract research funding. This increase is due to significant changes in four organisational units (SEK 125 million in the Faculty of Medicine, SEK 70 million in the Faculty of Science, SEK 31 in the Faculty of Social Sciences and SEK 22 million in the Faculty of Engineering) and small changes at the other organisational units. The largest grant providers are the Swedish Research Council (SEK 926 million), the EU (SEK 315 million), the Knut and Alice Wallenberg Foundation (SEK 252 million) and Formas (SEK 181 million).

Swedish Research Council funding has decreased by SEK 141 million since 2017.

Figure 7.3 shows the revenue increase in the last five years (excluding financial revenue and profit/loss from shares in subsidiary and associated companies) amounting in total to SEK 1 389 million.

Figure 7.3 Revenue (SEK million)

Expenditure

Expenditure for 2019 amounts to SEK 8852 million, excluding collections and transfers, which is an increase of SEK 388 million (4.6 per cent) from 2018. The largest item is staff costs, which amounts to SEK 5517million, an increase of SEK 281 million (5.4 per cent). There are two major reasons for the increase being higher than the standard salary increases. The fact that the contribution for the year for occupational pensions increased by SEK 69 million from the previous year and that the number of staff has increased (calculated in full-time equivalents). Compared with the previous year, the number of employees has increased by 286, which is an increase of 4.2 per cent. Nine staff categories increased and two decreased. The largest increase in number is in the category of administrative staff (76). The largest increase in this category is reported at the Faculty of Medicine (22), the Faculty of Science (11) and the central administration (10). Holders of career-development positions have increased by 70.

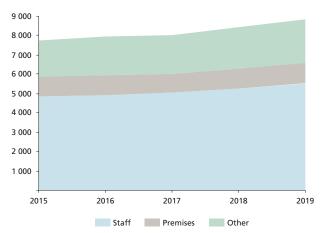

Expenditure for premises amounts to SEK 1 083 million, which is an increase of SEK 41 million (4.1 per cent) from the previous year. The increase is explained, mainly by increased rents and increased media costs.

The 'other' expenditure item amounts to SEK 2 240 million and comprises operating expenditure (SEK 1704 million) and depreciations (SEK 536 million), which represents an increase of SEK 88 million (4.1 per cent) from 2018. Significant changes to items within the operating costs are software licences, e-resources, in the form of databases and procured services under the

LUA/ALF agreement. The largest increase is in software licences which has increased by SEK 24 million (53.6 per cent) which can partly be accounted for by the fact that LADOK is no longer operated internally and is instead purchased as a licensed program. Another explanation is that the costs for foreign software licences are increasing due to the weakened Swedish currency.

The depreciations, which amount to SEK 536 million, represent an increase of SEK 31 million (6.1 per cent). The biggest changes were seen at MAX IV, which increased its depreciations by SEK 22 million and the Faculty of Medicine, which increased theirs by SEK 6 million. The financial costs amount to SEK 21 million, which is a decrease of SEK 13 million.

Figure 7.4 Expenditure (SEK million)

Education

First- and second-cycle education (including contract education) reports a surplus of SEK 17 million to be compared to the previous year's surplus of SEK 31 million.

The educational activities in 2019 in the first and second cycles, which may be settled against the funding cap, have generated a total of SEK 2 103 million, which is equal to the funding cap for the year. This means that the appropriation savings that can be saved and offset against an under-production in coming years is at the same level of approximately SEK 144 million.

Revenue in education amounts to SEK 2 663 million, which is an increase of 1.1 per cent compared to the previous year (SEK 2 635 million). Appropriation funding is the largest source of funding, accounting for 83 per cent of the revenue. Of the SEK 386 million in total fee revenue, SEK 124 million comprises fees from third-country students, which is an increase of SEK 14 million from 2018. Expenditure in education amounts to SEK 2 650 million, an increase of SEK 41 million compared to 2018. Staff costs, the major item, increased by SEK 63 million, resulting in a total of SEK 1711 million. This is due to annual salary increases, increased contributions for occupational pensions as well as an increase in the number of staff (calculated in full-time equivalents). Costs for premises increased by SEK 8 million to amount to SEK 423 million and the 'other' costs have decreased by SEK 27 million to amount to SEK 512 million in comparison with 2018. Commissioned activities, including both contract education and contracted courses report revenue of SEK 99 million, which is an increase of SEK 5 million compared to last year. The net financial income for education is a deficit of SEK 3 million, which is due to the negative interest rate.

Figure 7.5 Operating profit/loss for first- and second-cycle education (SEK million)

| | 2019 | 2018 | Change 2019–2018 | % | 2017 |
|--|-------|-------|---------------------|---------|-------|

| Change in capital for the year before collection and transfers | 17 | 31 | -14 | | 19 |

Research

Research and third-cycle education (including contract research) reports a surplus of SEK 40 million, which is equal to the surplus in 2018 of SEK 41 million. According to its financial planning, the University is to contribute SEK 55 million to ESS per year from 2013 to 2022. A sum of SEK 82 million was paid in 2014, and the outstanding amount of SEK 512 million in 2015. The annual allocation in the University's internal financing will in the future be reported as a surplus. Accordingly, SEK 55 million of the SEK 40 million surplus in 2019 is accounted for by this internal allocation. LU Holding (the University's holding company) had an impact on the surplus for research by SEK 11 million. The operating profit/loss for research in 2019 is thus a deficit of SEK 26 million.

The University's research activities have grown strongly in recent years. In parallel with the increased level of activity, there has been a rise in reserves for future strategic investments in the form of agency capital and unused grants. Grant revenue (new grants in 2019) amounts to SEK 3 470 million to be compared to SEK 3 170 million in 2018. Most faculties have reported an increase in grant revenue in 2019, and the greatest increase was at MAX IV (SEK 88 million), the Faculty

of Science (SEK 60 million) and the Faculty of Social Sciences (SEK 59 million).

Research revenue amounts to SEK 6 203 million, which is an increase of 348 million from 2018. Grant revenue, which is the largest source of revenue, amounts to SEK 3 302 million, an increase of SEK 282 million. The largest recipient of grant funding is the Faculty of Medicine, which accounts for 35.7 per cent of the University's total grant revenue. Revenue from fees amounts to SEK 355 million, which represents a decrease of SEK 9 million from the previous year.

Expenditure in research amounts to SEK 6 203 million, which is an increase of SEK 348 million (5.9 per cent). Staff costs amounting to SEK 3 805 million have increased by SEK 217 million (6.1 per cent). This is due to annual salary increases, increased contributions for occupational pensions as well as an increase in the number of staff (calculated in full-time equivalents). The 'other' costs item comprises operation and depreciation costs and has increased by SEK 115 million (7.1 per cent). Expenditure on premises has increased by SEK 32 million to amount to SEK 659 million.

Figure 7.6 Operating profit/loss for research and third-cycle education (SEK million)

Financial income, liquid assets and borrowing

Lund University reports a financial surplus of SEK 16 million for 2019, and a balance of cash and bank of SEK 4398 million at the close of the year, which is an increase of SEK 161 million compared to 2018. In 2019, there was a continued negative interest rate on the interest-bearing account at the National Debt Office during the first part of the year to then become zero. Regulations state that the University is to invest surplus liquidity in such an account at the National Debt Office. Consequently, costs are incurred by the invested funds. In a corresponding way, interest revenue has been received on the borrowings that according to regulations the University is to have with the National Debt Office for grant-funded investments

The net interest income from the account has decreased considerably in recent years and was negative for 2019. The decrease since 2015 is SEK 17 million. The University's borrowing and deposit rates at the National Debt Office are the same. Financial revenue amounts to SEK 14 million, compared to SEK 16 million in 2017. Financial revenue amounts to SEK 30 million (SEK 14 million in 2018), and mainly comprises unrealised gains from shares (SEK 21 million) in LU funds (in accordance with the K3 framework), other financial revenue (SEK 4 million) and exchange rate profits (SEK 3 million). Financial expenditure amounts to SEK 14 million (SEK 34 million in 2018), and mainly comprises interest expenditure associated with the account at the National Debt Office (SEK 10 million).

Agency capital and unused grants

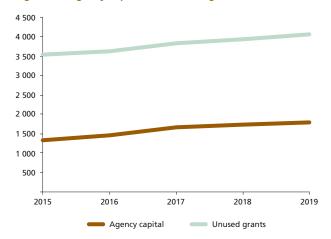

The total agency capital including the balance for the year is SEK 1791 million (SEK 1733 million in 2018), of which SEK 1700 million (1663 million in 2018) relates to the accumulated capital change (change in capital brought forward and change in capital for the year). The remainder of the agency capital is government capital, donated capital and shares of earnings in subsidiary and associated companies. Including the latter items, the agency capital increased by SEK 57 million during the year, and since 2015 increased by SEK 460 million. In 2015, the agency capital decreased considerably, due to the payment of an unconditional capital infusion to ESS amounting to a total of SEK 512 million.

More than half of the faculties have increased their agency capital in 2019. The largest amount of agency capital is accounted for by the Faculty of Medicine (SEK 491 million), followed by the Faculty of Engineering (SEK 307 million). The largest proportion of agency capital in relation to its own expenditure can be found at the Faculty of Social Sciences (26 per cent) and the Faculty of Science (21 per cent). The proportion for the whole of Lund University is 19.2 per cent. The objective was that by the end of 2019, the agency capital will amount to no more than 15 per cent, something in which the public authority has not been successful in spite of many good investments.

Unused grants continue to increase and amount to SEK 4058 million, which is an increase of SEK 133 million, or approximately 3.4 per cent, from 2018. Of the unused grants, SEK 301 million are calculated to be tied up for future depreciations.

Since 2015, unused grants have increased by SEK 522 million. Some faculties report an increase and other a decrease. The largest increase is from the Faculty of Medicine (SEK 62 million) and the Faculty of Social Sciences (SEK 44 million). The largest decrease is reported by MAX IV (SEK 28 million). MAX IV's unused grants are primarily to be used to cover depreciations and operating costs in the coming years. MAX IV Laboratory and the Faculty of Medicine together hold SEK 2 425 million, or 60 per cent, of the total unused grants. The figure below shows that both the agency capital and the unused grants continue to increase in 2018.

Figure 7.9 Agency capital and unused grants (SEK million)

Opportunities and challenges

Lund University is an international university that conducts high quality education and world-leading research that impacts and improves our society. The University's significant breadth offers good conditions for cross-disciplinary meetings and the ability to address major societal challenges. For a number of years, Lund University has experienced good economic growth, primarily within research. The growth within education has been significantly weaker. Of the University's overall research revenue, 60 per cent comes from external financing. The University's success in obtaining external grants is a sign of strength. At the same time, a high proportion of external financing limits the University's possibilities to decide on its own priorities and strategic choices, to take long-term strategic responsibility as an employer and to conduct basic research.

The University continues to generate a certain amount of surplus. Primarily this takes place at faculties that are facing greater commitments in the form of increased premises costs, but also at faculties with a large proportion of external funding. In recent years, the shift towards an increasing proportion of external funding has led to financial conditions becoming less stable. Scheduled new construction, major renovations and infrastructure investments can also lead to a certain amount

of capital being created during a limited period. Parts of the agency capital are therefore tied up in different types of long-term commitments, for example in the form of co-financing and depreciations.

MAX IV is Sweden's largest investment in research infrastructure and a flagship within Swedish research. MAX IV comprises a significant technology leap that has drawn attention from all over the world. Together with ESS, MAX IV demonstrates how Sweden is taking a prominent role as a research nation. In order to take full advantage of the potential of the large-scale MAX IV and ESS facilities, a unique environment is planned for the area between these - Science Village Scandinavia (SVS). Lund University has a vision to establish an internationally leading research, innovation and education centre in this environment. This environment can develop into an important meeting place for research and development from different higher education institutions and companies. Such an environment may be very significant in the reinforcement of the potential of Swedish companies and organisations to develop and contribute to sustainable solutions and sustainable production. MAX IV, ESS and SVS will considerably reinforce Sweden's attractiveness and international profile, while being a major financial challenge.

Donations

Reporting requirements: the University shall report the development of the returns in relation to the market index.

The capital and disposable income from donations administered in accordance with Section 12 of the Donations Ordinance amount to SEK 206.9 million (SEK 166.2 million in 2018). The market value of the assets on the day of closure of accounts was SEK 208.3 million (SEK 180.3 million in 2018). Returns over the year amounted to SEK +9.2 million (SEK +2.2 in 2017). Dividends have been paid out according to the donors' requests. During 2019, SEK 1.3 million (SEK 11.4 million in 2018) have been distributed to departments within Lund University, of which SEK 1.1 million (SEK 9.3 million in 2018) from capital. The University's administrative costs have been calculated and debited from the donated funds. The reimbursement for costs incurred comes to SEK 255 664 (SEK 246 602 in 2018).

The expectations for 2019 were low following the stock exchange concerns at the end of 2018. However, the securities markets have increased strongly across the board. For example, both global shares and Swedish shares have risen by over 30 per cent. The most important explanation for this is likely to be the reversals of the central banks. Signs of increases to key interest rates have been replaced by decisions to wait as well as assurances that they are ready to take incentive measures if required. Neither the American nor the European Central Bank raised their key interest rates during the year and in China different incentive measures have been put in place.

Concerns in the form of, for example, trade wars and Brexit remain and periodically shake the market. However, the stock exchange seems to continue to be strong and most strategists and economists are counting on a continued upwards trend, at least in the short term.

The University's investments have provided an average distributable income including capital gains of +2.0 per cent

(+5.2 per cent in 2018). The interest rate for treasury bills amounted to -0.5 per cent (-0.8 per cent in 2018). Total return on the portfolio amounted to +16.6 per cent (-1.9 per cent in 2018). The development for the portfolio's benchmark index was +9.9 per cent (-2.5 per cent in 2018). During the year, investments in two new long-term interest funds were made. All funds previously in the portfolio remain. The returns for these are reported below. The returns from the Swedish equity funds were +26.1 per cent, +19.3 per cent and +32.2 per cent, the investments in the index-tracking global equity fund +37.8 per cent (in SEK). The investments in the current global equity fund increased to +37.2 per cent and +35.7 per cent (in SEK). The development of the Swedish dividend index SIXRX amounted to +35.0 per cent, Eurostoxx (in SEK) +32.4 per cent, and the T-bill -0.5 per cent. The benchmark index consists of: SIXRX (15 per cent), Eurostoxx50 (15 per cent) and the T-bill (70 per cent).

Asset distribution in equity and interest-bearing investments are shown in the figure below.

During the year, the University received the following large donations (SEK 1 million and above):

Donation from Bo Bergström. The funds are to go to Lund University, the Faculty of Theology, Division of the History of Christianity for the ongoing publication of Carlquist, Lunds stifts herdaminne, together with supplements and registry. SEK 5.4 million

Donation from Hillevi Svensson. For support of research on pulmonary vascular diseases and prostate cancer. SEK 3.7 million.

Donations received for the period 2015–2019 are shown in figure 7.10 below.

Notes on appropriation reporting

1) Distributed grants financed from the state budget amount to SEK 60 267 000 and are reported under transfers in the statement of income. Of these distributed grants, SEK 3 265 000 relates to the financing of graduate schools, SEK 49 335 000 to the transfer of strategic research funding, SEK 7 367 000 to support for the students' unions and the transfer of strategic educational funding SEK 300 thousand.

Other financial terms

Item 16.2:5:1 Learning support for students with disabilities

 $Learning \ support \ for \ students \ with \ disabilities \ has \ not \ exceeded \ 0.3 \ per \ cent \ of \ the \ appropriations \ for \ first \ and \ second-cycle \ education.$

Item 16.2:5:1 Expenditure for personal injury insurance for students

The annual premium for 2019 is SEK 160 087 based on 27 938 full-time equivalent students.

Personal injury insurance is now dealt with by the Swedish Council for Higher Education, which is not able to produce statistics per institution.

Additional information and notes

ACCOUNTING PRINCIPLES

The annual report has been drawn up in accordance with the Annual Reports and Budget Documentation Ordinance (2000:605) and the Bookkeeping Ordinance (2000:606).

The cut-off date for the current accounting for the period was 3 January 2020.

Figures in the financial report are given in SEK thousand unless otherwise stated.

Higher education institutions are exempt from certain directives in ordinances as follows.

Higher education institutions are exempted from the regulations on reporting of appropriations pursuant to Section 12 of the Appropriations Ordinance (2011:223). Settlement against appropriations and appropriation items for funding paid to the institutions' interest-bearing accounts at the National Debt Office shall take place in conjunction with the monthly payments to each institution's interest-bearing account at the National Debt Office.

Higher education institutions are exempted from Section 7 of the Appropriations Ordinance (2011:223) in that the institutions are permitted to transfer both over-production and unused production below the funding cap (appropriation saving) to a value of no more than ten per cent of the funding cap to the following financial year without making a special request to the Government.

Higher education institutions are exempted from the regulation in Chapter 2 Section 4 third paragraph of the Annual Reports and Budget Documentation Ordinance (2000:605) that the annual report shall contain information on circumstances of significance. Higher education institutions shall instead submit information in accordance with Annex 6 (Key performance indicators) of the public service agreement.

In conjunction with the drawing up of notes to the annual report, higher education institutions shall take special care to specify

- loan facilities at the National Debt Office divided into approved loan facilities and used loan facilities at the close of the financial year, and
- approved and maximum used loan facilities at the National Debt Office.

Higher education institutions are exempted from the regulation of Chapter 2 Section 4 paragraph two of the Annual Reports and Budget Documentation Ordinance (2000:605) on the submission of a financial analysis to the Government in the annual report.

Higher education institutions are exempted from the regulation in Chapter 2 Section 1 first paragraph and Section 3 of the Capital Supply Ordinance (2011:210) on the financing of fixed assets. A fixed asset used in the authority's activities may be wholly or partly financed through grants received from non-governmental sources. This also applies to grants from state funding bodies on the condition that the grant has been awarded for the purpose.

Lund University has the right pursuant to Section 12 of the Donations Ordinance (1998:140) to administrate funds in shares and other securities. The University can also assign another party to invest these funds pursuant to Section 12 second paragraph. The University shall report the development of the returns in relation to the market index.

Higher education institutions are exempted from Section 25 a second and third paragraphs of the Fees Ordinance (1992:191) on the use of revenue from fee-charging activities. If the accumulated surplus amounts to more than 10 per cent of the turnover from fee-charging activities during the financial year, the public authority shall state in the annual report how the surplus is to be used. If there is a deficit in a fee-charging activity which is not covered by a surplus brought forward from the previous financial year, the public authority shall submit a proposal to the Government in its annual report for how the deficit is to be covered.

Valuation of bank funds in foreign currencies

The balance of the EUR account as of 31 December 2019 has been recalculated using the exchange rate in force on the balance sheet date.

Valuation of receivables and liabilities

Receivables amount to SEK 123 million, which is a decrease of SEK 27 million from the previous year. Receivables that are older than six months have been written off as probable bad debt losses. Accounts payable amount to SEK 304 million, a decrease of SEK 233 million compared to 2017. The decrease is explained partly by a donation of SEK 154 million and a larger fixed asset of nearly SEK 21 million that were managed in 2018, which demonstrates that the current amount is a return to more normal conditions. Receivables and liabilities in foreign currencies have been entered using the exchange rate in force on the balance sheet date.

Valuation of stock

Stock has been valued at market value on the balance sheet

Valuation of fixed assets

Intangible fixed assets primarily comprise capitalised expenditure for the development of existing infrastructure to ensure future benefits for the organisation in terms of finances and quality through the use of newer and more efficient computerised administrative systems. The economic life shall be at least three years and the acquisition value at least SEK 500 000. The acquisition value includes both external purchases and the University's own direct costs for the individual asset. Intangible fixed assets are depreciated linearly over the calculated economic life starting from the month the assets are put into service.

Tangible fixed assets are primarily fixtures and equipment etc. The economic life shall be at least three years and the acquisition value at least SEK 25 000. Tangible fixed assets are

depreciated linearly over the calculated economic life starting from the month the assets are put into service.

Expenditure for improvements to leased property that refers to repairs and maintenance is activated when the acquisition sum exceeds SEK 100 000 and the economic life is calculated as longer than three years. The depreciation period for expenditure for improvements to leased property is adjusted to match the remaining length of the lease.

The following depreciation periods are applied:

| Intangible fixed assets | 3, 4 or 5 years |
|---|--|
| Expenditure for improvements to leased property | 3–25 years, in acc. with the lease + any extension |
| Fixed equipment | 3, 5, 7 or 10 years |
| Computers and associated equipment | 3, 5, 7 or 10 years |
| Laboratory/workshop equipment | 3, 5 or 10 years |
| Office machines and photocopiers | 3, 4 or 5 years |
| Furnishings | 3, 5 or 10 years |

There is no depreciation for works of art. Only the acquisition value of works of art acquired or transferred from the National Public Art Council since 2004 are included on the balance sheet. No estimate of current value for previously acquired works of art has been carried out.

For large fixed assets, consisting of several components, component depreciation is carried out in cases where the use of significant components differs considerably. In these cases, the fixed asset is allocated to different components and each component is depreciated separately.

Cut-off items

A cut-off means that any income and expenditure is to be assigned to the year that it concerns. Possible cut-off items include accounts payable, holiday pay liabilities, fees and grants. For expenditure cut-off items, a limit of SEK 50 000 has been applied. Invoices that have been received but not entered onto the books by the cut-off date and which concern 2019 have been manually entered as accounts payable and expenditure.

Since 2004, the University has made provisions for accrued costs for teaching staff salaries. The provisions have been made for liabilities that will not be regulated in the three-year perspective of the teaching staff agreement. The liability is based on a real number of hours and is calculated in accordance with a standard average salary for each staff category.

For externally financed grants and commissions, the current state accounting principle for revenue accounting in projects is applied. For ongoing projects, revenue is entered to correspond to costs incurred during the year. Received funding from grant providers that has not yet been used in the operations is reported as unused grants on the balance sheet. For projects completed during the course of the year, the difference between revenue and expenditure is reported as profit/loss on the statement of income. Projects for which contracted grants have not yet been received are reported as a claim on the grant provider for the part that comprises costs incurred. The validity of the claim is also tested against the contract or equivalent agreement.

Reporting of overhead costs

The University applies the SUHF model for accounting of overhead costs, which is common to all higher education institutions. Under the model, overhead costs are distributed by month based on costs incurred, which entails full cost reporting at the lowest level of operations (cost objects) and provides the conditions for correct allocation of grant revenue.

The University distributes the costs of the administrative services (overhead costs) among the cost objects relative to direct salary and operating costs (the distribution basis).

Transfers

The University reports transfers separately, as they do not represent a real use of resources within the University. Transfers are funding that is intended to be used to finance grants to external partners, scholarships, etc. Funding corresponding to expenditure has been taken from government appropriations and grants. Examples of transfers are scholarships, EU funding for projects coordinated by the University, and transfer of strategic research funding to other higher education institutions.

Balancing of accounts with other public authorities

It must be possible to separate out every transaction with another public authority in the consolidated reporting to the Government. Received grants and fees, and distributed grants and purchases shall be reported and reconciled with every public party for amounts exceeding SEK 1 million. For receivables and liabilities spanning the end of the financial year, amounts over SEK 100 000 shall be reconciled. Lund University has a unique code in its code string for each public authority and a single code for all other parties, in order to separate out these transactions. Following this year's reconciliation with other public authorities, the University has no unexplained discrepancies.

Donations

The University has approval from the Government pursuant to Section 12 of the Donations Ordinance to invest donated funds that will not be used within the next two years outside the National Debt Office. The need for liquid funds over the next two years is expected to amount to SEK 14 million.

NOTES

Amounts in SEK thousand unless otherwise stated.

1. Revenue from government appropriations

| | 2019 | 2018 |
|--|-----------|-----------|
| Research and third-cycle education | 2 196 255 | 2 145 060 |
| First- and second-cycle education | 2 104 950 | 2 067 649 |
| Reimbursement for clinical training and research | 456 887 | 446 264 |
| Reimbursement for financial analysis | 4830 | 4 785 |
| Total revenue from appropriations | 4 762 922 | 4 663 758 |

Distributed grants financed from the state budget amount to SEK 60 267 000 and are reported under transfers in the statement of income. Of these distributed grants, SEK 3 265 000 relates to the financing of graduate schools, SEK 49 335 000 to the transfer of strategic research funding, SEK 7367 000 to financial support to the students' unions and transfer of strategic educational funding SEK 300 thousand.

2. Revenue from fees and other charges

| | 2019 | 2018 |
|--|---------|---------|
| Education of fee-paying students | 124 080 | 110 431 |
| Contract research | 104 238 | 95 119 |

| Consultancy and similar services | 243 583 | 211 570 |
| Premises, parking | 60 320 | 105 372 |
| Conferences and courses | 9 627 | 12 095 |
| Information and teaching materials | 5 2 3 8 | 5 579 |
| Journals and other publications | 1 183 | 852 |
| Total revenue in acc. with Section 4 of Fees Ordinance | 319 951 | 335 469 |
| Copies of public documents (Sec. 15 Fees Ordinance) | 79 | 45 |
| Total copies public documents (Sec. 15 Fees Ordinance) | 79 | 45 |
| Invoicing of expenditure, sales of materials | 21 341 | 42 685 |
| Accounting services for foundations etc. | 7 806 | 7 660 |
| Sponsorship | 2 137 | 895 |
| Delay charges and damages | 1 575 | 2 892 |
| Total revenue from other charges | 32 859 | 54 132 |
| Capital gain on sales of fixed assets to non-gov. | 587 | 33 |
| Total capital gain on sale of fixed assets to non-gov. parties | 587 | 33 |
| Total revenue from fees and other charges | 740 791 | 744 024 |
| Revenue pursuant to Section 4 (excl. premises) in relation to total expenditure* | 3.0 % | 2.8 % |
| * From 2009, higher education institutions may charge fees for premises originally leased for the institution's own operations without the limitations of section 4 second paragraph. In 2019, revenue from rents amounted to SEK 50 328 000 (SEK 96 385 000 in 2018). | | |
| 30 320 000 (3EK 30 303 000 III 20 10). | | |
| Separate reporting of fee-charging activities – service exports | | |
| Separate reporting of fee-charging activities | 189 483 | 193 977 |

Service exports are defined as services sold by the University to parties abroad. Expenditure is calculated to be equal to revenue. From 2013, the SUHF recommendation is used to calculate service exports. There has been an increase in tuition fees of SEK 13.6 million and contracted courses by SEK 4 million, but a decrease of contract education by SEK 14.8 million, consultancy and similar services by SEK 6 million and contract research by SEK 2.7 million.

3. Revenue from grants (by funding body)

| | 2019 | 2018 |
|---|-----------|-----------|
| Public agencies incl. public enterprise | 1 636 576 | 1 595 699 |

| Approved loan facilities at the National Debt Office | 545 000 | 600 000 |

36. Short-term debts to other public authorities

| | 2019 | 2018 |
|---|---------|---------|
| Debts, Swedish Tax Agency (employer contributions) | 90 723 | 88 099 |
| Accounts payable, other public agencies | 65 729 | 70 711 |
| VAT carried forward | 17 971 | 23 021 |
| Total debts to other public agencies | 174 423 | 181 831 |

37. Accounts payable

| | 2019 | 2018 |
|------------------------------------|---------|---------|
| Accounts payable, non-governmental | 238 110 | 465 913 |

38. Other short-term debts

| | 2019 | 2018 |
|--|---------|---------|
| Clearing account EU | 184 753 | 70 142 |
| Employees' PAYE | 88 813 | 84 355 |
| Miscellaneous clearing accounts (uninvestigated payments etc.) | 5 381 | 15 582 |
| Other liabilities | 421 | 10 963 |
| Grants for redistribution from non-gov. funding bodies | 0 | 8 |
| Total other liabilities | 279 368 | 181 051 |

39. Deposits

| | 2019 | 2018 |
|---|-------|---------|
| Deposits from students for keys/key cards | 3 676 | 3 7 7 4 |

40. Accrued expenditure

| | 2019 | 2018 |
|--|---------|---------|
| Accrued holiday pay liabilities | 212 328 | 209851 |
| Accrued social insurance contributions | 116 787 | 130 179 |
| Accrued salaries | 27 043 | 53 975 |
| Other accrued expenditure public authorities (clinical academics etc.) | 900 | 1 000 |
| Other accrued expenditure | -1 902 | -10 572 |
| Total accrued expenditure | 355 156 | 384 433 |

41. Unused grants (by funding source)

| | 2019 | 2018 |
|---|-----------|-----------|
| Public agencies incl. public enterprise | 2 007 880 | 2 042 256 |
| Other organisations and non-profit associations | 1 207 608 | 1 139 180 |
| EU institutions | 221 624 | 202 376 |
| Other countries and international organisations | 208 367 | 164 119 |
| Donations ¹ | 137 513 | 118 714 |
| Local and regional authorities | 127 419 | 115 523 |
| Private companies | 98 914 | 91 632 |
| Private individuals | 48 375 | 50 817 |
| State-owned companies | 322 | 844 |
| Total unused grants | 4 058 022 | 3 925 462 |

1) Donated funds are mainly donations from private individuals.

The total amount of unused grants for 2019 includes SEK 301345 000 (SEK 333887 000 in 2018) tied up for future depreciations. This corresponds to 7.43 per cent (8.51 per cent in 2018).

Rate of use of unused government grants calculated according to the HFR model

Unused grants SEK 2 020 395 000 (SEK 2 050 273 000 in 2018) minus accrued grant revenue SEK 95 466 000 (SEK 101 439 000 in 2018).

| Rate of use | 2019 | 2018 |
|-----------------|-----------|-----------|
| Within 3 months | 410 984 | 396 201 |
| 3–12 months | 1 232 952 | 1 188 604 |
| 1 year–3 years | 280 992 | 364 029 |
| >3 years | 0 | 0 |
| Total | 1 924 928 | 1 948 834 |

The difference from unused grants by funding source is due to government funding paid via non-governmental funding bodies.

42. Other prepaid revenue

| | 2019 | 2018 |
|--|---------|---------|
| Prepaid internal commissions and other sales, other | 186 886 | 174 074 |
| Prepaid internal commissions and other sales, other public authorities | 49 100 | 44 322 |
| Prepaid rental revenue, external | 1 088 | 2 265 |
| Total other prepaid revenue | 237 075 | 220 661 |

The total amount of other prepaid revenue for 2019 includes SEK 1705 000 (SEK 2219 000 in 2018) tied up for future depreciations. This corresponds to 0.72 per cent (1.01 per cent in 2018).

43. Reporting of fees pursuant to Chapter 3 Section 2 of the Annual Reports and Budget Documentation Ordinance

| Reporting of fee-funded activities (SEK thousand) | | | | | | |
|--|--|--------------------------|-----------------|---------------------|--------------------------|------------------------------|

| Letting of accommodation in accordance with government (U2010/4277/UH) | decision | | | | | |
| Other under annex 4 | 0 | 0 | 4 054 | 4054 | 0 | 0 |
| Total | -80 361 | 427 | 68 447 | 73 667 | -5 220 | -85 154 |

Service exports are included in the revenue as follows: SEK 17997000 for contract education, SEK 7545000 for contracted courses, SEK 17894000 for contract research and SEK 124080000 for education of fee-paying students.

44. Reporting pursuant to Section 25a of the Fees Ordinance

| | 2019 | 2018 |
|--|---------|---------|
| A. Accumulated surplus in fee-funded activities | 23 523 | 14 536 |
| B. Total turnover for the year for fee-funded activities | 318 868 | 289 265 |
| A as a percentage of B | 7.4 % | 5.0 % |

Board decision

Per Arfvidsson Board member

The University Board approved the annual report for the 2019 financial year at its meeting on 14 February 2020. We confirm that the annual report gives a true and fair view of the financial outcome of the year and of expenditure, revenue and Lund University's financial position. We also judge that the internal governance and control at the University was satisfactory for the period covered by the annual report.

¹⁾ Excluding contract education and contracted courses.

The figures concerning research students are annually updated as there is a delay with regard to registration in the doctoral student registry.

²⁾ Expenditure per full-time equivalent student and annual performance equivalent cannot be totalled. Both include total expenditure. Contract education and contracted courses are not included.

³⁾ Figures refer to newly admitted students and not only to new higher education entrants.

⁵⁾ Figures for 2019 are not reported.

⁶⁾ The staffing situation in December of the respective year.

⁷⁾ Full-time equivalents (FTE) excluding staff paid by the hour. In 2019, staff paid by the hour corresponded to a total of 234 FTEs.

⁸⁾ Excluding collection, transfers and profit/loss from shares in subsidiary and associated companies.

9) Excluding collection and transfers.

LUND UNIVERSITY'S VISION

A world-class university that works to understand, explain and improve our world and the human condition.
