

- Master of Science in Molecular Biology
- 2 years, full-time, 120 ECTS credits
- Department of Biology
- Lund Campus
- Application deadline: January 2022
- Programme start: August 2022

## PROGRAMME OVERVIEW

This programme aims to give students of molecular biology a solid foundation for a career in medically related areas. These areas have played, and will continue to play, a central role in pharmaceutical and biotechnological development. The programme also deals with subjects related to commercial applications, such as the development of diagnostic tools and quality control.

### Special features of the programme:

- Broad range of courses related to medical biology, including pharmacology, immunology, infection biology and neurobiology
- Integration of theory and laboratory skills training
- Insights into the drug development process, from research to clinical use
- Extensive training in oral and written communication provides a solid basis for the use of relevant terms and expressions within medical biology and related areas
- Extracurricular activities, such as seminars and site visits, are offered

## PROGRAMME MODULES/COURSES

**COURSES AND NUMBER OF CREDITS:** Semester 1: Immunology (15 credits), Pharmacology (15 credits). Semester 2: Immunology and Infection Biology (15 credits), Antibiotics (7,5 credits), Bioinformatics (7,5 credits). Semester 3: Neurobiology (15 credits, optional), MSc thesis project (45 credits). Semester 4: Continuation of MSc thesis project (45 credits). For the full list of electives, see <https://www.biology.lu.se/education/masters-degree-programmes/masters-programme-molecular-biology-medical-biology>

Most courses are full-time studies, and you take only one course at a time. The courses are typically teaching-intensive with lectures, seminars, theoretical and practical exercises as well as self-studies.

During one semester, you take two courses of 15 credits (i.e. a total of 60 credits per year).

## CAREER PROSPECTS

The knowledge and skills you gain on this programme will open doors to employment in industry, academia and the public sector, both nationally and internationally. This could be in the biotechnology, pharmaceutical or food industries, in patent and legal issues, education or research funding. The programme also provides you with a solid grounding for PhD studies.

## ENTRY REQUIREMENTS AND HOW TO APPLY

### Entry requirements

A Bachelor's degree of at least 180 credits or the equivalent, of which 120 credits must be in science/ biomedicine/engineering, including 45 credits in molecular biology comprising genetics, cell biology and microbiology; 15 credits in human/animal physiology; 30 credits in chemistry comprising biochemistry. English Level 6.

### How to apply

1. **Apply online:** Go to [www.lunduniversity.lu.se/medical-biology](http://www.lunduniversity.lu.se/medical-biology). Click on "Apply" and follow the instructions for the online application at [www.universityadmissions.se](http://www.universityadmissions.se), the Swedish national application website. Rank the chosen programmes in order of preference.
2. **Submit your supporting documents:** Check what documents you need to submit (i.e. official transcripts, degree diploma/proof of expected graduation, translations, proof of English, passport) and how you need to submit them at [www.universityadmissions.se](http://www.universityadmissions.se).
- **Programme-specific supporting documents:** When applying for this programme, you must also submit a 'Summary Sheet' with your application. See the programme webpage for details.
3. **Pay the application fee (when applicable).**

### Selection criteria/additional info

The selection will be based on grades awarded for previous academic courses and the statement of purpose (from the applicant's 'Summary sheet').

“If you really want to be in biomedical research, then this programme is the best. I feel it gives you all the ideas and knowledge you need, as well as the ability to think independently. When you join this programme, you're given different aspects of learning. You're taught in class, and you get practical time in the lab, but you're also challenged to do some tasks independently.”

Christine Mercy Mueni from Kenya

### Tuition fees

Tuition fee SEK 145 000 per year for non-EU/EEA citizens. No fee for EU/EEA citizens. See [www.lunduniversity.lu.se](http://www.lunduniversity.lu.se) for details on tuition fees

### ABOUT THE DEPARTMENT OF BIOLOGY

We have outstanding competence in education and research, covering a large number of biological disciplines from molecular biology to large-scale ecology. Several of our research groups are world-leading in their topic and a large number of international projects is coordinated by the department of Biology. As our education is integrated with the department's research, you will have researchers as teachers and get involved in ongoing projects during your studies. Our courses range from basic to Master's level. We offer around 50 advanced level courses as well as an extensive postgraduate programme.

### ABOUT LUND UNIVERSITY

Lund University was founded in 1666 and is repeatedly ranked among the world's top 100 universities. The University has around 44 000 students and more than 8 000 staff based in Lund, Helsingborg and Malmö. We are united in our efforts to understand, explain and improve our world and the human condition.

Lund is considered one of the most popular study locations in Sweden. The University offers one of the broadest ranges of programmes and courses in Scandinavia, based on cross-disciplinary and cutting-edge research. The unique disciplinary range encourages boundary-crossing collaborations both within academia and with wider society, creating great conditions for scientific breakthroughs and innovations. The University has a distinct international profile, with partner universities in almost 70 countries.

Lund University has an annual turnover of more than EUR 880 million, of which two-thirds go to research in our nine faculties, enabling us to offer one of the strongest and broadest ranges of research in Scandinavia.

The establishment of the world-leading facilities MAX IV and European Spallation Source (ESS) will have a major impact on future scientific and industrial development in both materials science and life science. MAX IV is the leading synchrotron radiation facility in the world while ESS will feature the world's most powerful neutron source when it starts producing neutrons in 2023. These facilities together with the new University campus in Science Village will constitute a science complex and an international hub for research, education and innovation in which Lund University plays a central role.
