Programme overview

The Master of Fine Arts is a two-year programme offering more specialised artistic training through individual studio practice and courses in art and various related disciplines. During the first year, students begin their advanced artistic work, with different types of teacher-led seminars and a study trip. Just like in the Bachelor’s programme, students choose from a range of technical and theoretical courses, many of which are taught by internationally recognised artists. The Academy also offers a variety of guest lectures and international collaborations.

In the second year, students focus on their degree projects (60 credits), which includes writing an essay (approximately 10 pages) about their own artistic practice and presenting a solo exhibition at the Academy’s gallery. Students who pass their degree project are awarded a Master of Fine Arts. Professors at Malmö Art Academy act as examiners for Master’s students and an external examiner is always invited to participate in the assessment.

Career prospects

On completion of the programme, students will have acquired broad and specialised practical and theoretical knowledge and skills for independent work in a variety of professional roles. Furthermore, students will have acquired the ability to work in an independent and self-directed manner, autonomously reflecting on, formulating and processing artistic issues so as to contribute to the development of knowledge in the field. The programme also provides an excellent basis for PhD studies.

Entry requirements and how to apply

ENTRY REQUIREMENTS

A Bachelor of Fine Arts or an equivalent qualification and the general entry requirements for higher education studies in Sweden or the equivalent. Students must also have a portfolio of artistic work samples.

“First, I was here as an exchange student and then I was very impressed by how much of the training is based on discussion and individual work. The Malmö Art Academy is very different from other art schools in that way. It’s so good that you are guaranteed to have your own studio. The environment is very tolerant of what I want to achieve with my projects.”
